Note:

All wall surfacing materials including wallcoverings, should be selected taking into account the building in which they are to be installed. Buildings that have had liquid or vapor moisture infiltration problems or that have other conditions that make moisture infiltration likely are at risk for mold growth. Should these factors become an issue please consult with a professional about the benefits and limitations of wallcovering. All textural type patterns are designed to simulate natural materials. Color, texture and shading should be anticipated as these variations are part of the manufacturing process and add to the richness and beauty of the product.
